

DécorColors

DécorColors have been developed to be used in the most prestigious lime finishes. Their very fine dispersion is carefully balanced in a water-based suspension and makes them unique for coloring all lime based plasters and paint. Their best colors are obtained when mixed with lime-based finishing's as they are particularly resistant to alkali/acids, atmospheric acid and conditions and especially to UV light rays.

The color range is composed by natural elements, steel oxide and by synthesis.

Texture

Color pigments comes in a concentrated suspension form (liquid) with different specific gravity weights for each color.

Color: Variety of colors

Benefits of Product: Developed for products with a high PH level, and blends well with Lime.

Special features of Color: Colors ending in ER are (Extreme Resistance), colors ending in OX are oxides and both of these are suitable for external and internal use.
